How to Apply

How can the Female Students Transport to The University

The female student can get the university transport service in some simple and easy steps, as following:

The first step:

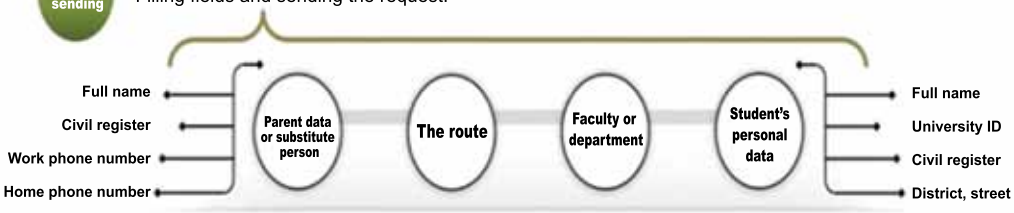
Applying

The registration of the female student who wishes to get the transport service will be on the following website (http://utd.mu.edu.sa)

The second step:

Filling and sending

Filling fields and sending the request.



The Third Step:

Transportation card

The student logs in the website and queries her data, and then it will show the itinerary with the name of the driver and his phone number.

University Transportation System

The Routes Icon: This icon contains the different routes from which students are transported to the different colleges of the university.

The routes are electronically put by order so that the student can choose the appropriate route that allows her to commute.

1	King Abdul Aziz District at Majmaah	21	Sadir clan.
2	Al-Andalus District at Majmaah	22	Al-Safrat.
3	Al-Matar District at Majmaah	23	Tameer-Alazezeya District.
4	Al-Yarmouk District at Majmaah	24	Tameer-Alkhaldiyah District.
5	Al-Jamaeen District at Majmaah	25	Tameer-Almarajem District.
6	Al-Moukbel District at Majmaah	26	Aloseah.

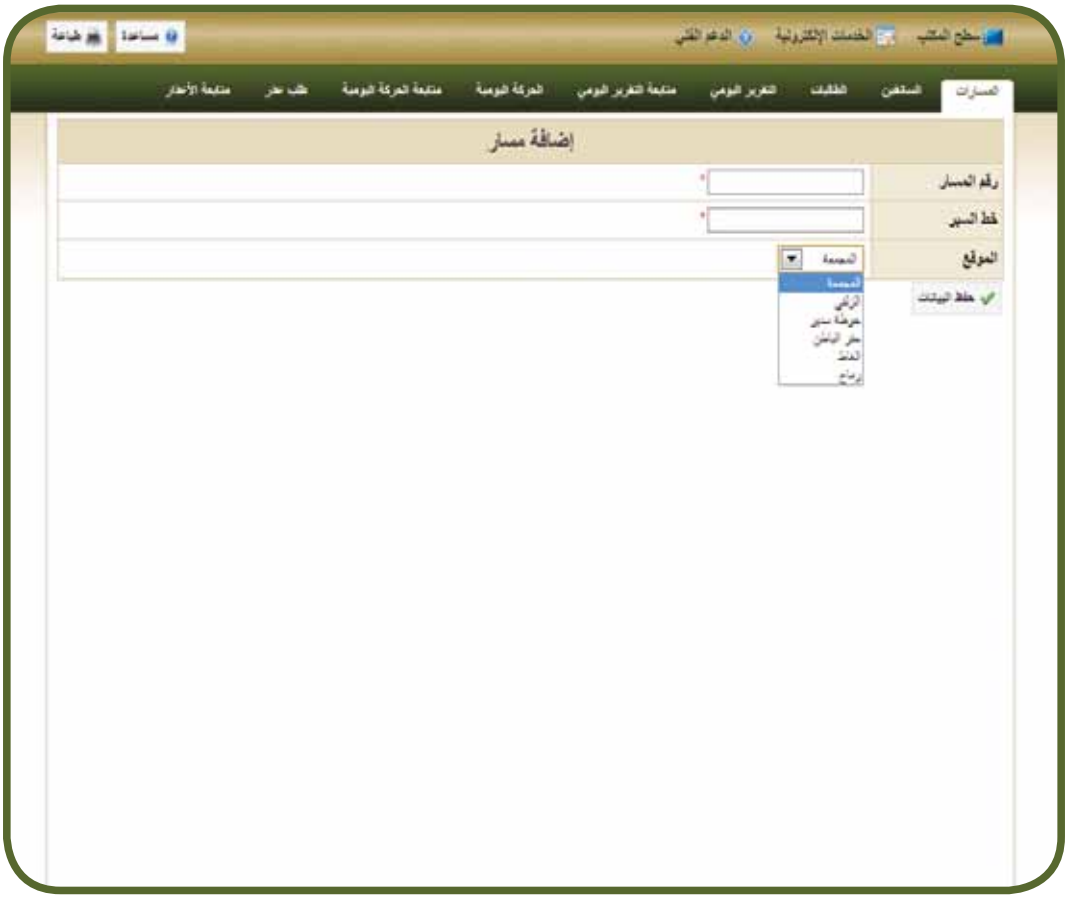
The model of The Routes Icon via The Electronic System

The model of how to Add The Itinerary via The System



The students' icon:

The student's application can be linked to the registration web of the system through this icon. Then the student's whole registration information in the system,e.g the faculty, the department, the academic year, and the means of communication with the student's guardian appear to the expert's. Also a copy of the family card appears to the student's guardian and according to this copy the student will be in the driver's list.

General Information:

- The number of students who are enrolled in university transport system are about 6200 students with 180 buses and 175 itineraries. The Colleges that can benefit from this service are :

(College of Education at Majmaah – College of Applied Medical Sciences - College of Computer Science - Dean ship of Preparatory year - College of Education at Al-Zulfi - College of Sciences and Humanities at Al-Ghat - College of Sciences and Humanities at Hawtat Sadir - College of Sciences and Humanities at Ramah - College of Business Administration - College of Dentistry at Al-Zulfi - College of Medicine).

- The services provided by the university transportation system to the students who are enrolled in the electronic transportation system are :
- Field training students are commuted from the College of Education to the general education schools and back to their homes in villages and centers which are affiliated to the scope of the university.
- The field training students of applied sciences are commuted from the college of Applied Medical Sciences and the college of Medicine to hospitals and health centers.
- The students who participate in visits are transported to other colleges.
- The Special Needs routes (Elite).
- Routes to transport franchise and continuous field training students.

The model of Students' Icon which is Associated with the Enrollment Web via the Electronic University Transport System

The Drivers' Icon via the University Transportation System

This icon concerns the registration of all the drivers, their data, their buses numbers, the route number and the itinerary. Then it is handed out to the drivers, and all the students move to each route with each driver via a separated list which is copied by the system. Each list includes information about the driver, his bus, students who are allowed him to transport and also the locations and colleges. It can also be used in case of needing any information about the driver to get it through a special icon dedicated to the contractor which insert information about all the drivers and their data.

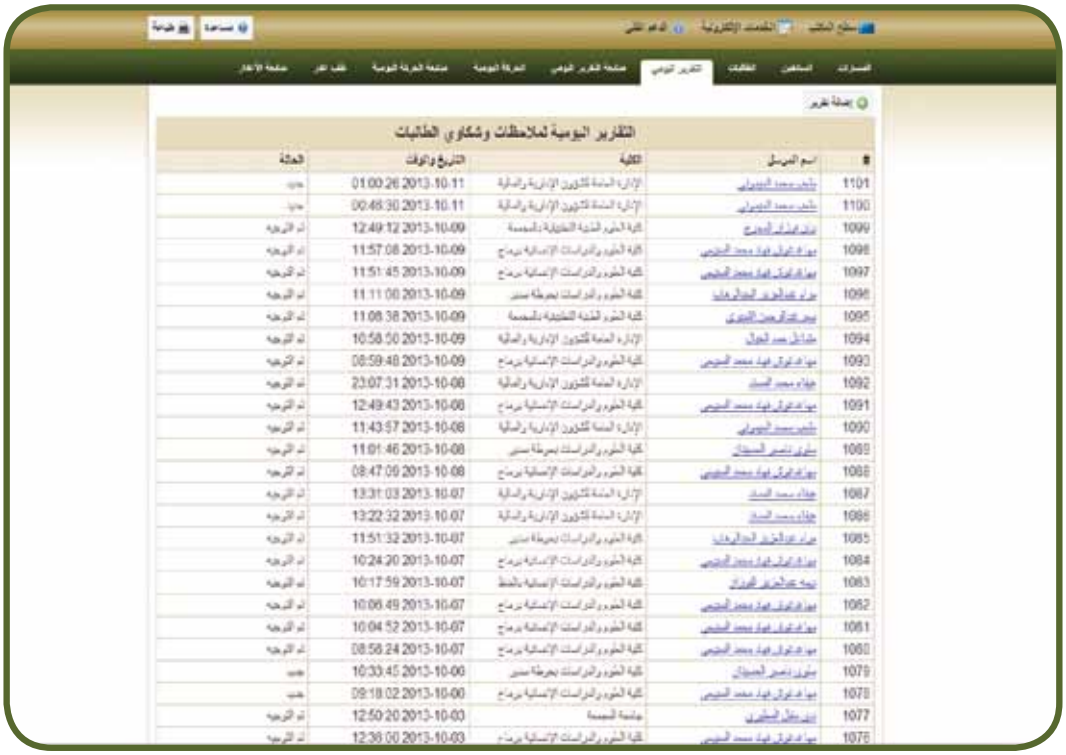
The Daily Reports Icon:

This icon concerns with receiving the feedback of the transport supervisors, the colleges, and the students who registered in the university transportation system. All feedback and the report of the sender, are processed daily for immediate action.

After the feedback and reports are received from all the colleges, these are processed daily for immediate necessary action by all concerned.

The Model of the Daily Reports Icon



The Daily Reports Observation Icon:

This icon concerns with those who are responsible for the transportation to receive the feedback of the system, process it, and inform the college and the supervisors what has been happened according to what was mentioned in the Daily Reports Icon.

The Model of the Daily Reports Observation

The Icon of Introducing the Daily Preparation of Students' Data:

This icon concerns with the supervisors and the field observers. They can receive, through this icon, the daily preparations of the drivers and the students. The data of the preparation are daily inserted by the system to ensure the observation of the accuracy of buses movement, its seats, and its routes.

The Model of the Daily Attendance Icon

The Daily Movement Icon:

This icon concerns with daily insertion of the buses movement for each college respectively via the field observers of each college. The observations of the buses and the drivers are electronically inserted into the system daily.

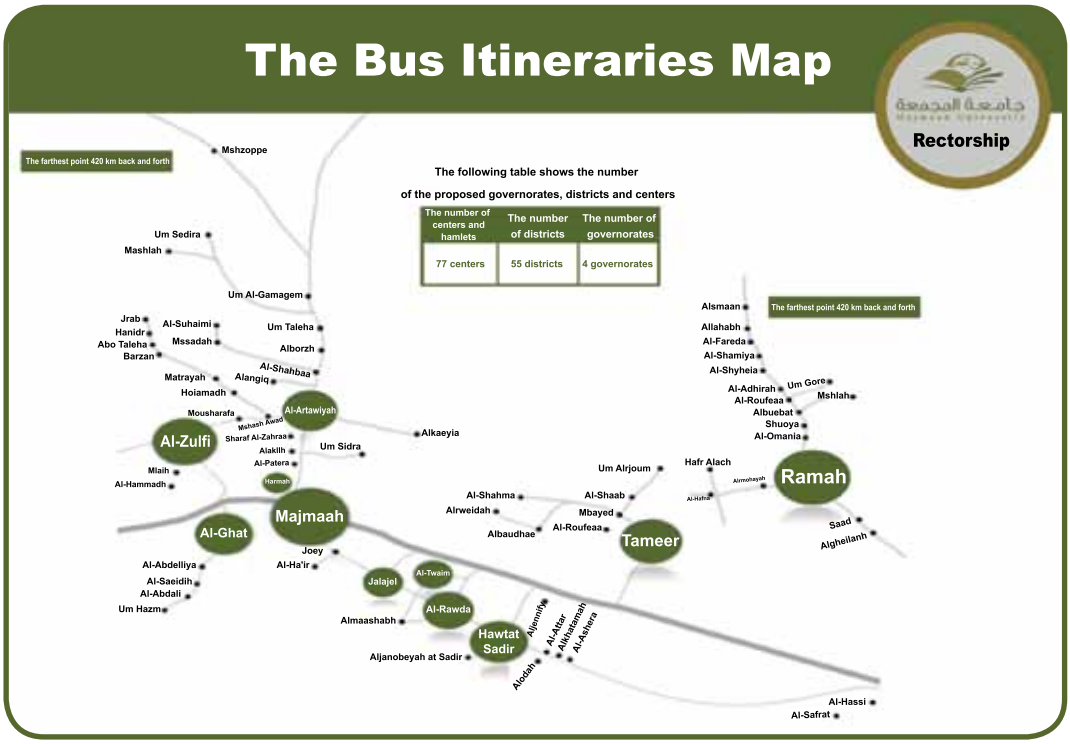
The Model of the Daily Movement Icon

The Daily Movement Observation Icon:

This icon concerns with observing the daily movement data which is uploaded by the bus observers every day at all colleges, processing the observations with the responsible person, and also give directions to ensure efficiency.

The Model of Inserting the Daily Movement Report

The Model of the Bus Itineraries Map from the Governorates, Villages, Hamlets, and Centers to the University Colleges



Activities and field training Students' Transportation Request Service Icon:

This icon concerns with providing the transportation service to the colleges and the students who are enrolled in the transportation system. It also provides the service of transporting the field training, and visits students to the colleges via the university's official website. This service is provided accurately, taking into consideration all the criteria of safety.

The Query for Student's Data Icon:

This icon is designed to provide any query about the student academic status, attendance that is provided by the Deanship of Admission and Registration Web (edugate).

The Model of the Query for Student's Data

The Evaluation Icon:

The aim of this icon is to observe the performance of the supervisors who monitor the system of the students' transportation through the buses. After uploading the daily reports of buses movement, then, the evaluation of the staff is uploaded so that the transportation department can do its best to serve the students properly and to handle any problem, if any.

The Model of the Evaluation Icon

Informing About any Meteorological Phenomenon Icon:

This icon concerns with adding any observations about the circumstances that will affect the bus itinerary or the attendance of the students. This service allows the student, the parent, or citizens to report any meteorological phenomena via the university website,

After that, the phenomena will be sent to the weather support unit to study it and send it to the authorized person to give the instructions in conjunction with the reports of the Civil Defense Administration and the General Presidency of Meteorology and Environment Protection.

The Model of the Meteorological Phenomenon Reporting Icon

Monitoring buses' speed and movement

The goal of this system is to monitor the speed and movement of buses in which students commute daily from their villages and settlements to the university campuses.
